At least Claim 1 appears anticipated by the previously uncited prior art, UNIQUE Landscape Rake and Grading Tool, Claim 1 being amended and Claim 16 being added by Preliminary Amendment to overcome this anticipation. In Claim 1 as amended, scarifying teeth which extend from the main frame and which are located between the blade and the tines have been added. In added Claim 16, the scarifying teeth in Claim 3 are described as being located between the blade and the tines.
